Courses of Interest: Artificial Intelligence, Software Engineering, Operating Systems, System Programming, Computer Networks, Computer Architecture and Organization, Distributed System, OOP, Database Systems.

SOFTWARE ENGINEERING PROGRAM | ALX AFRICA 🔗   **Aug 2023 - Oct 2024**

An intensive **12-month** program (**8-month Software engineering foundations** and **3-month Backend specialization**). Dedicated **70+ hours per week** to mastering software engineering concepts through project-based learning, peer collaboration, and real-world problem solving.

Courses of Interest: Low-level programming, Databases, Web programming, Unit & Integration testing, Configuration Management, DevOps fundamentals, and Shell script.

COMPETITIVE PROGRAMMING | Africa to Silicon Valley (A2SV)   **Jan 2025 - Present**

- Google backed (twice) tech organization

Courses of Interest: Data Structures and Algorithms, Software Development: Frontend, Backend, Mobile App.

EXPERIENCE

FULL-STACK DEVELOPER | Abronal Technologies   **Sep 2025 - Present**

ASP.NET MVC | jQuery | HTML | CSS

In my current role, I work on several key parts of our business software. I build, update, and fix the **Sales**, **Inventory**, **Procurement**, **Industial Production**, and **Expense Management** modules. These software are used by many different companies and government offices to help them manage their daily work efficiently.

PROJECTS

MarketQ | **B2B E-commerce Web Application**: 🔗

Django (DRF) | React | Tailwind CSS | Pure CSS | PostgreSQL | Docker
A B2B e-commerce web application that connects manufacturers and suppliers. It was recognized as one of the **top projects in my university college**, earning a **Certificate of Appreciation** from the president himself.

PyCodeQ | VISUAL STUDIO CODE EXTENSION: 🔗

An extension installed by **450+** developers helping them automatically write clean and **pycodestyled Python** code.

Ethiopic Fonts | CANVA PLUGIN: 🔗

A user-friendly plugin that helps designers to easily access and use **100+ Amharic fonts** for their creative projects.

Catch4Q | CHROME EXTENSION: 🔗

Built and integrated a **chrome extension** that prevents students from cheating on exams at my college.

WeAskOnline | ALX_SE TEAM PROJECT: 🔗

Flask | SQLAlchemy | MySQL
A collaborative project to build and document a Quora-inspired web API, focusing on robust backend functionality and team-based development.
